IUB Commission of Editors of Biochemical Journals. The citation of bibliographic references in biochemical journals. Recommendations (1971). 1

IUPAC–IUB Commission on Biochemical Nomenclature (CBN). Nomenclature of iron–sulphur proteins. Recommendations (1973). 5

IUPAC–IUB Commission on Biochemical Nomenclature (CBN). Amendments and corrections (1973). 9

Proteins

Effect of high tyrosine content on the determination of tryptophan in protein by the acidic ninhydrin method. Application to chicken ovoinhibitor.
By J. C. Zahnley & J. G. Davis 59

Structural studies on individual components of bovine transferrin.
By N. E. Richardson, N. Buttress, A. Feinstein, A. Stratil & R. L. Spooner 87

High total histone/deoxyribonucleic acid ratios for rat liver nuclei.
By S. K. Chanda, R. Ickowicz & A. L. Dounce 115

A phosphorylated light-chain component of myosin from skeletal muscle.
By W. T. Perrie, L. B. Smillie & S. V. Perry 151

Refolding of triose phosphate isomerase.
By S. G. Waley 165

[2-(3-Nitrotyrosine)]oxytocin, a weakly active analogue of the hormone bound by neurophysin (*Short Communication*).
By D. B. Hope & M. Walti 241

Preparation of insoluble collagen from human cartilage (*Short Communication*).
By F. S. Steven & H. Thomas 245

The binding of cationic detergent to insulin, zinc–insulin and iso-insulin (*Short Communication*).
By K. S. Birdi 253

Nucleic Acids

Thermolability of 28S ribosomal ribonucleic acid from the liver of *Crotalus durissus terrificus* (Ophidia, Reptilia).
By J. F. Giorgini & F. L. de Lucca 73

PAGE

Reaction products from *N*-methyl-*N*-nitrosourea and deoxyribonucleic acid containing thymidine residues. Synthesis and identification of a new methylation product, O^4-methylthymidine.
By P. D. Lawley, D. J. Orr, S. A. Shah, P. B. Farmer & M. Jarman 193

The alkylation of 2′-deoxyguanosine and of thymidine with diazoalkanes. Some observations on *O*-alkylation.
By P. B. Farmer, A. B. Foster, M. Jarman & M. J. Tisdale 203

Molecular integrity of chloroplast ribosomal ribonucleic acid (*Short Communication*).
By C. J. Leaver 237

Lipids

The structure of novel C_{35} pentacyclic terpenes from *Acetobacter xylinum*.
By H. J. Förster, K. Biemann, W. G. Haigh, N. H. Tattrie & J. R. Colvin 133

Induction of orientation of bacterial cellulose microfibrils by a novel terpenoid from *Acetobacter xylinum*.
By W. G. Haigh, H. J. Förster, K. Biemann, N. H. Tattrie & J. R. Colvin 145

Carbohydrates

Studies on β-glucanases. Some properties of a bacterial endo-β-(1→3)-glucanase system.
By D. J. Manners & G. Wilson 11

The structure of a β-(1→3)-D-glucan from yeast cell walls.
By D. J. Manners, A. J. Masson & J. C. Patterson 19

The structure of a β-(1→6)-D-glucan from yeast cell walls.
By D. J. Manners, A. J. Masson, J. C. Patterson, H. Björndal & B. Lindberg 31

Enzymology

Regulation of locust fat-body phosphorylase.
By S. W. Applebaum & H. M. Schlesinger 37

Regulatory properties of adenosine triphosphate–L-methionine *S*-adenosyltransferase of rat liver.
By J. B. Lombardini, T.-C. Chou & P. Talalay 43

PAGE

The kinetics of interconversion of intermediates of the reaction of pig muscle lactate dehydrogenase with oxidized nicotinamide–adenine dinucleotide and lactate.
By N. G. Bennett & H. Gutfreund 81

Effects of lipid removal on the molecular size and kinetic properties of bovine plasma arylesterase.
By B. J. Kitchen, C. J. Masters & D. J. Winzor 93

Steady-state enzyme kinetics with high-affinity substrates or inhibitors. A statistical treatment of dose–response curves.
By P. J. F. Henderson 101

Studies on the sulphation of 3,4-dihydroxyphenylethylamine (dopamine) and related compounds by rat tissues.
By W. N. Jenner & F. A. Rose 109

Enzyme forms produced from aspartate transcarbamoylase by digestion with trypsin.
By E. Heyde, A. Nagabhushanam & S. Venkataraman 125

The nature of the electrophoretically separable multiple forms of rat liver monoamine oxidase.
By M. D. Houslay & K. F. Tipton 173

PAGE

Heparan sulphate sulphotransferase. Properties of an enzyme from ox lung.
By T. Foley & J. R. Baker 187

The purification and regulatory properties of α-oxoglutarate dehydrogenase from *Acinetobacter lwoffi*.
By M. G. Parker & P. D. J. Weitzman 215

Effect of high- and low-protein diets on the regulation of rat liver tyrosine aminotransferase and tryptophan oxygenase activities by L-tyrosine and L-tryptophan.
By H. Mukhtar, M. K. Sahib & C. R. Krishna Murti 225

Evidence that chick tendon procollagen must be denatured to serve as substrate for proline hydroxylase (*Short Communication*).
By L. Murphy & J. Rosenbloom 249

Intermolecular Organization

Optical-rotatory-dispersion studies of compounds related to cholesterol in liposomes and the membranes of erythrocyte 'ghosts'.
By J. R. Green, P. A. Edwards & C. Green 6?

The interaction between ribonuclease A and surfactants.
By M. N. Jones, H. A. Skinner, E. Tipping & A. Wilkinson 231

Contents of Volume 135, No. 2

PAGE

Proteins

The purification and properties of the lectin from potato tubers, a hydroxyproline-containing glycoprotein.
By A. K. Allen & A. Neuberger 307

A hydroxyproline-containing glycopeptide released from the walls of sycamore tissue-culture cells by hydrazinolysis.
By M. F. Heath & D. H. Northcote 327

The formation of ferritin from apoferritin. Catalytic action of apoferritin.
By I. G. Macara, T. G. Hoy & P. M. Harrison 343

Superoxide dismutase: a contaminant of bovine catalase (*Short Communication*).
By B. Halliwell 379

Nucleic Acids

The occurrence of two types of synthesis of deoxyribonucleic acid during normal growth in *Bacillus subtilis*.
By W. J. Harris 315

PAGE

A spectrophotometric study of the secondary structure of precursor ribosomal ribonucleic acid from Krebs ascites-tumour cells.
By A. A. Hadjiolov & R. A. Cox 349

Evidence for the binding of the carcinogen 3-methylcholanthrene to both the purine and the pyrimidine bases of hamster fibroblast deoxyribonucleic acid (*Short Communication*).
By P. A. Jones, W. Gevers & A. O. Hawtrey 375

Carbohydrates

O-Methyl sugars in lipopolysaccharides of Rhodospirillaceae. Identification of 3-*O*-methyl-D-mannose in *Rhodopseudomonas viridis* and of 4-*O*-methyl-D-xylose and 3-*O*-methyl-6-deoxy-D-talose in *Rhodopseudomonas palustris* respectively.
By J. Weckesser, H. Mayer & I. Fromme 293

The structure of a polymer containing galactosamine from walls of *Bacillus subtilis* 168 (*Short Communication*).
By V. N. Shibaev, M. Duckworth, A. R. Archibald & J. Baddiley 383

PAGE

Small Molecules

The catalase activity of ferrihaems.
By P. Jones, T. Robson & S. B. Brown 353

Oxidation of deuteroferrihaem by hydrogen peroxide.
By P. Jones, K. Prudhoe & T. Robson 361

Enzymology

Mechanism and stereochemistry of the 5-aminolaevulinate synthetase reaction.
By Z. Zaman, P. M. Jordan & M. Akhtar 257

Properties and mechanism of action of creatine kinase from ox smooth muscle. Anion effects compared with pyruvate kinase.
By B. Focant & D. C. Watts 265

The contractile and regulatory proteins of insect flight muscle.
By B. Bullard, R. Dabrowska & L. Winkelman 277

PAGE

Reduction of α-oxo carboxylic acids by pigeon liver 'malic' enzyme.
By C. L. Tang & R. Y. Hsu 287

Studies by electron paramagnetic resonance on the catalytic mechanism of nitrogenase of *Klebsiella pneumoniae*.
By B. E. Smith, D. J. Lowe & R. C. Bray 331

Amino acid activation in mammalian brain. Purification and characterization of tryptophan-activating enzyme from buffalo brain.
By C.-C. Liu, C.-H. Chung & M.-L. Lee 367

Intermolecular Organization

A comparative study of ribonuclease hydrolysis of rat brain-cortex and liver membrane-bound ribosomes.
By H. Simpkins, E. Panko & S. Tay 299

Contents of Volume 135, No. 3

PAGE

Proteins

Collagen cross-linking. Isolation of cross-linked peptides from collagen of chicken bone.
By D. R. Eyre & M. J. Glimcher 393

The transporting proteins of cholecalciferol and 25-hydroxycholecalciferol in serum of chicks and other species. Partial purification and characterization of the chick proteins.
By S. Edelstein, D. E. M. Lawson & E. Kodicek 417

The isolation and partial characterization of ribonuclease A from *Bison bison*.
By G. R. Stewart & K. J. Stevenson 427

Qualitative determination of *N*-terminal amino acids of peptides and proteins with cobalt(III) chelates.
By K. W. Bentley & E. H. Creaser 507

Nitrogenase of *Klebsiella pneumoniae*. Interaction of the component proteins studied by ultracentrifugation.
By R. R. Eady 531

The reactive serine residue in phosphoglucomutase of *Micrococcus lysodeikticus* (*Short Communication*).
By C. P. Milstein, J. B. Clarke & H. G. Britton 551

PAGE

Phosphorylation of myelin basic protein by an adenosine 3′:5′-cyclic monophosphate-dependent protein kinase (*Short Communication*).
By P. R. Carnegie, B. E. Kemp, P. R. Dunkley & A. W. Murray 569

Nucleic Acids

The use of sodium perchlorate in deproteinization during the preparation of nucleic acids (*Short Communication*).
By J. Wilcockson 559

Ribonucleic acid–deoxyribonucleic acid hybridization as a second-order reaction (*Short Communication*).
By B. D. Young & J. Paul 573

Lipids

The sterols of the echinoderm *Asterias rubens*.
By A. G. Smith, I. Rubinstein & L. J. Goad 443

Incorporation of radioactive mevalonate into C_{50} and C_{55} prenols by *Streptococcus mutans* (*Short Communication*).
By K. J. I. Thorne 567

Small Molecules

An explanation of the asymmetric binding of sugars to the human erythrocyte sugar-transport systems (*Short Communication*).
By J. E. G. Barnett, G. D. Holman & K. A. Munday 539

PAGE

Enzymology

Cross-specificity in some vertebrate and insect glutathione-transferases with methyl parathion (dimethyl *p*-nitrophenyl phosphorothionate), 1-chloro-2,4-dinitrobenzene and *S*-crotonyl-*N*-acetylcysteamine as substrates.
By A. G. Clark, J. N. Smith & T. W. Speir 385

Palmitoyl-coenzyme A synthetase. Isolation of an enzyme-bound intermediate.
By J. Bar-Tana, G. Rose & B. Shapiro 411

N-Acetyl-β-D-hexosaminidase component A. Different forms in human tissues and fluids.
By J. U. Ikonne & R. B. Ellis 457

Molecular weight and amino acid composition of the exocellular DD-carboxypeptidase–transpeptidase of *Streptomyces* R61.
By J.-M. Frère, J.-M. Ghuysen, H. R. Perkins & M. Nieto 463

Enzymic mechanisms involving concomitant transfer and hydrolysis reactions.
By J.-M. Frère 469

Kinetics of concomitant transfer and hydrolysis reactions catalysed by the exocellular DD-carboxypeptidase–transpeptidase of *Streptomyces* R61.
By J.-M. Frère, J.-M. Ghuysen, H. R. Perkins & M. Nieto 483

Fluorescence and circular-dichroism studies on the *Streptomyces* R61 DD-carboxypeptidase–transpeptidase. Penicillin binding by the enzyme.
By M. Nieto, H. R. Perkins, J.-M. Frère & J.-M. Ghuysen 493

Functional groups in the activity and regulation of *Escherichia coli* citrate synthase.
By M. J. Danson & P. D. J. Weitzman 513

PAGE

Use of progress curves to investigate product inhibition in enzyme-catalysed reactions. Application to the soluble mitochondrial adenosine triphosphatase.
By R. D. Philo & M. J. Selwyn 525

Separation and partial characterization of two types of alkaline phosphatase from *Serratia marcescens* (*Short Communication*).
By A. R. Bhatti 537

Purification and properties of an enzyme duet, phosphoribosylaminoimidazole carboxylase and phosphoribosylaminoimidazolesuccinocarboxamide synthetase, involved in the biosynthesis of purine nucleotides *de novo* (*Short Communication*).
By C. A. H. Patey & G. Shaw 543

The effects of chronic phenobarbitone administration and subsequent withdrawal on the activity of rat liver tryptophan pyrrolase and their resemblance to those of ethanol (*Short Communication*).
By A. A.-B. Badawy & M. Evans 555

Inhibition of 3-phosphoglycerate dehydrogenase from *Pisum sativum* by purine nucleotides (*Short Communication*).
By J. C. Slaughter 563

Intermolecular Organization

Protein synthesis and loss of viability in rye embryos. The lability of transferase enzymes during senescence.
By B. E. Roberts & D. J. Osborne 405

The effect of surfactant structure on ribonuclease A–surfactant interactions (*Short Communication*).
By C. Blinkhorn & M. N. Jones 547

Contents of Volume 135, No. 4

PAGE

Proteins

A comparison of the physical and chemical properties of four cytochromes *c* from *Azotobacter vinelandii*.
By W. H. Campbell, W. H. Orme-Johnson & R. H. Burris 617

The biosynthesis of plasmodial myosin during starvation of *Physarum polycephalum*.
By F. H. White & J. Lascelles 639

PAGE

The chemistry of the collagen cross-links. The characterization of Fraction C, a possible artifact produced during the reduction of collagen fibres with borohydride.
By S. P. Robins & A. J. Bailey 657

Purification and some properties of rabbit antiovalbumin.
By A. A. Ansari & A. Salahuddin 705

The amino acid sequence of cytochrome *c'* from *Alcaligenes* sp. N.C.I.B. 11015.
By R. P. Ambler 751

PAGE

Characterization of the proteins of guinea-pig hair and hair-follicle tissue.
By P. M. Steinert & G. E. Rogers 759

The formation of ferritin from apoferritin. Inhibition and metal ion-binding studies.
By I. G. Macara, T. G. Hoy & P. M. Harrison 785

Some characteristics of the coagulation Factor X*a* purified from human serum.
By Å. G. Berre, B. Østerud, T. B. Christensen, T. Holm & H. Prydz 791

The thermal denaturation of human oxyhaemoglobins A, A_2, C and S.
By J. Kinderlerer, H. Lehmann & K. F. Tipton 805

Purification and properties of a mouse liver plasma-membrane glycoprotein hydrolysing nucleotide pyrophosphate and phosphodiester bonds.
By W. H. Evans, D. O. Hood & J. W. Gurd 819

Immunochemical characterization of proteins from mouse liver plasma membranes.
By J. W. Gurd, W. H. Evans & H. R. Perkins 827

Collagen cross-links. A mass-spectrometric and ^{1}H- and ^{13}C-nuclear-magnetic-resonance study.
By E. Hunt & H. R. Morris 833

Polymerization of proteins with glutaraldehyde. Soluble molecular-weight markers.
By J. W. Payne 867

Isolation and characterization of a glycoprotein from human colostrum.
By J. H. Nichols & A. Bezkorovainy 875

The electrophoretic mobility of peptides on paper at pH 1.9 (*Short Communication*).
By C. J. Bailey & J. A. M. Ramshaw 889

The amino acid sequence around the reactive cysteine residue in human plasma Factor XIII (*Short Communication*).
By J. J. Holbrook, R. D. Cooke & I. B. Kingston 901

Nucleic Acids

Nucleotide sequence analyses of the cytoplasmic 5S ribosomal ribonucleic acid from five species of flowering plants.
By P. I. Payne, M. J. Corry & T. A. Dyer 845

Carbohydrates

The molecular-weight distribution of glycosaminoglycans.
By J. J. Hopwood & H. C. Robinson 631

PAGE

The direction of glycan synthesis in a bacterial peptidoglycan.
By J. B. Ward & H. R. Perkins 721

Conformation of the mucopolysaccharides. X-ray fibre diffraction of heparin.
By I. A. Nieduszynski & E. D. T. Atkins 729

Small Molecules

The interaction of 3-deoxy-3-fluoro-D-glucose with the hexose-transport system of the human erythrocyte.
By G. J. Riley & N. F. Taylor 773

Enzymology

The subcellular distribution and properties of aldehyde dehydrogenases in rat liver.
By S. O. C. Tottmar, H. Pettersson & K.-H. Kiessling 577

The nature and mode of action of the cellulolytic component C_1 of *Trichoderma koningii* on native cellulose.
By G. Halliwell & M. Griffin 587

Affinity chromatography of nicotinamide–adenine dinucleotide-linked dehydrogenases on immobilized derivatives of the dinucleotide.
By S. Barry & P. O'Carra 595

Glycyl-L-leucine hydrolase, a versatile 'master' dipeptidase from monkey small intestine.
By M. Das & A. N. Radhakrishnan 609

Oxaloacetate decarboxylases of rat liver.
By B. Dean & W. Bartley 667

Some components of the cholinergic system in the prawn *Palaemonetes varians* (Leach).
By R. D. Veldsema-Currie 673

Purification and some properties of cytoplasmic aspartate aminotransferase from sheep liver.
By M. Campos-Cavieres & E. A. Munn 683

Kinetic studies of the acylation of pig muscle D-glyceraldehyde 3-phosphate dehydrogenase by 1,3-diphosphoglycerate and of proton uptake and release in the overall enzyme mechanism.
By P. J. Harrigan & D. R. Trentham 695

γδ-Dioxovalerate as a substrate for the glyoxalase enzyme system.
By T. Jerzykowski, R. Winter & W. Matuszewski 713

The reaction pathway of membrane-bound rat liver mitochondrial monoamine oxidase.
By M. D. Houslay & K. F. Tipton 735

PAGE

The reliability of Michaelis constants and maximum velocities estimated by using the integrated Michaelis–Menten equation.
By G. L. Atkins & I. A. Nimmo 779

The mechanism of the reaction between glutathione and 1-menaphthyl sulphate catalysed by a glutathione *S*-transferase from rat liver.
By B. Gillham 797

Aromatic amino acid transaminase in rat intestine.
By J. Nakamura, T. Noguchi & R. Kido 815

Purification and properties of rabbit muscle L-glycerol 3-phosphate dehydrogenase.
By P. Bentley, F. M. Dickinson & I. G. Jones 853

The steady-state kinetics of isotope exchange for one substrate–one product enzymic reactions.
By I. G. Darvey 861

3-Hydroxy steroid dehydrogenase activities of cortisone reductase.
By W. Gibb & J. Jeffery 881

Assay for glutamine synthetase activity (*Short Communication*).
By J. E. Vorhaben, L. Wong & J. W. Campbell 893

PAGE

Use of affinity chromatography for the quantitative study of acceptor–ligand interactions: the lactose synthetase system (*Short Communication*).
By P. Andrews, B. J. Kitchen & D. J. Winzor 897

Intermolecular Organization

Binding of oligosaccharides of hyaluronic acid to proteoglycans (*Short Communication*).
By T. E. Hardingham & H. Muir 905

General Methods

A new general method for the assessment of the molecular-weight distribution of polydisperse preparations. Its application to an intestinal epithelial glycoprotein and two dextran samples, and comparison with a monodisperse glycoprotein.
By R. A. Gibbons, S. N. Dixon & D. H. Pocock 649

Appendix: Derivation of an approximate function relating c and ξ for Schulz molecular-weight distributions in the meniscus-depletion condition in the equilibrium ultracentrifuge.
By R. A. Gibbons 653
